Payment options

ECIR allows you to integrate different popular payment systems into your website

stripe

PayPal

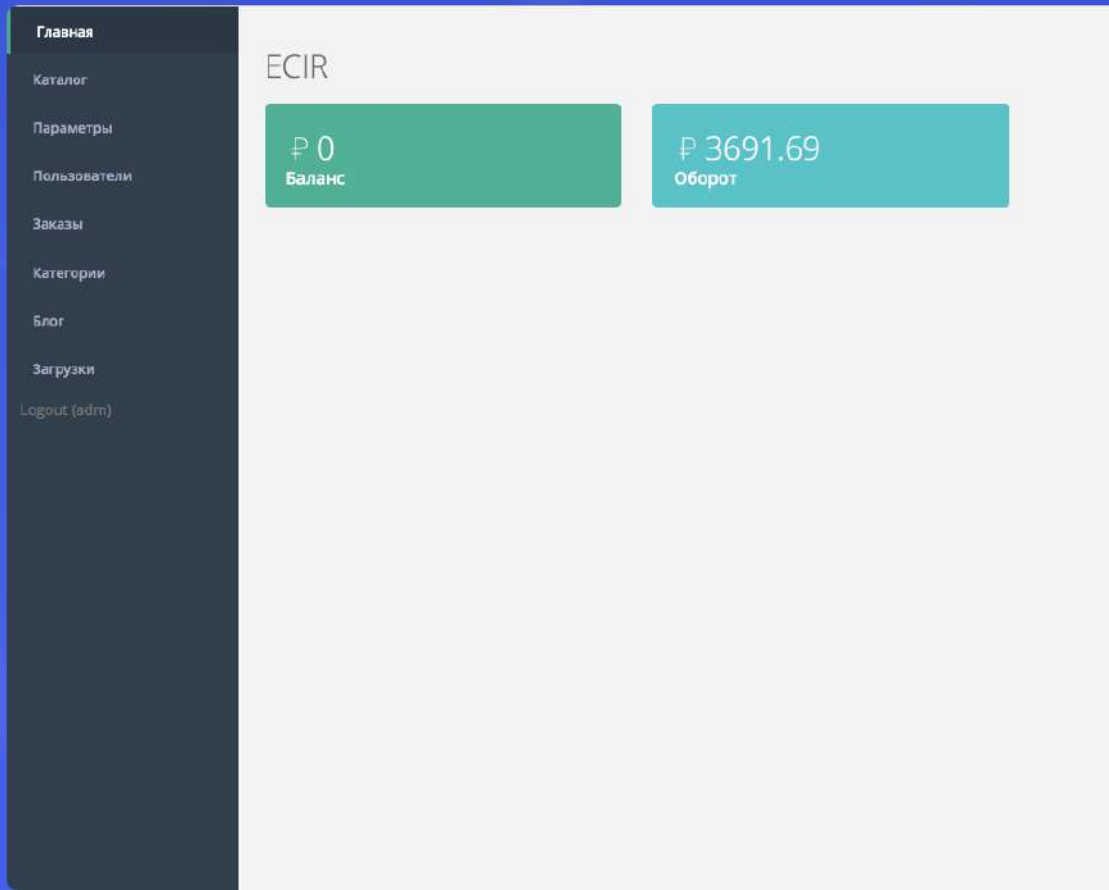

*We integrate your payment method via the API to your website which allows you to receive payment directly from your clients

Account balance

For each seller we have developed account balance within the system. Each time an order is made by your client your balance changes.

- 1 Your client purchased a service from your site that costs \$2
 - 2 The real cost price of that services for dealer is \$0.5
 - 3 If you have a "Start" Package we receive a 40% fee. Your balance therefore changes: $\$0.5 + 40\% = \0.7
 - 4 After your balance changes for $-\$0.7$ we queue your order and start working on it.
- ! In case insufficient funds are available on your account balance or your balance is negative, your orders will not be processed.
 - ✓ You can add funds to your account balance through admin dashboard via Stripe service by Credit Card / PayPal
